The Malabo Montpellier Panel is conducting an online survey to provide a platform to capture African youth’s voices, aspirations, and demands within the context of agrifood systems transformation. By youth, we mean the young population aged 15 to 35 years.

Click here to access the 5-minute survey.

This survey assesses the challenges/barriers and opportunities for effective youth empowerment in agrifood value chains (production, processing, distribution, consumption, etc.). We appreciate your opinions on what can be done to attract more youth to take on employment or entrepreneurship in the sector. The survey outcomes will be incorporated into the publication of its next Malabo Montpellier Panel report in February 2024 and the Malabo Montpellier Forum.

About the Malabo Montpellier Panel
The Malabo Montpellier Panel convenes 18 leading experts in agriculture, engineering, ecology, nutrition, and food security. It aims to facilitate policy choices by African governments to accelerate progress toward food security and improved nutrition. The Panel identifies areas of progress and positive change across the continent and assesses what successful African countries have done differently. It identifies the institutional and policy innovations and program interventions that other countries can best replicate and scale. The related Malabo Montpellier Forum provides a platform to promote policy innovation; it uses the evidence produced by the Panel to facilitate dialogue among high-level decision-makers on African agriculture, nutrition, and food security.
